

# INDEX

<b>A</b>	
Absorbance	
detector in HPLC, schematic of	
fluorescence monitor with	106f
detector, UV	2
of pesticides	123t
UV and fluorescence	103-125
2-ABZI (2-aminobenzimidazole)	328
AC polarography	75
Acaricides	367
Acidic herbicides, derivatives of	233t
Acids, gas phase	354
Acylation reactions of ethylene-	
thiourea (ETU)	244f
<i>N</i> -Acylation of ETU, extractive	245-247
Adduct ions	362
Adipose tissue, pesticides in	252
Adsorbents	210
inorganic	181
Adsorption chromatography, column	209
Adsorption chromatography, silica gel	113
AFD (alkali flame detector)	254
Agricultural pesticides	66
Agricultural treatment sites, analysis	
of pesticidal residues near	177-202
Air	
chemical reactivity of pesticides in	197
determination of paraquat residues	
in	179
field measurements of pesticide	
concentrations in	189
pesticide vapors entry into	195
sampler for pesticide vapors, dia-	
gram of portable	185f
samples	183f
Airborne	
conversions of pesticides, effect of	
sunlight on	200
pesticidal residues near agricultural	
treatment sites, analysis of	177-202
pesticide residues	
methods of sampling and analysis	
of	178
sampling media for	182
sources of	189
Albumin, bovine serum (BSA)	328, 330
Albumin, human serum	330
Alcohols, aliphatic	241
Alcohols, phosphorylation reactions of	242f
Aldrin	252
Aliphatic alcohols	241
Aliphatic amines	241
Alkali flame detector (AFD)	254
Alkaline phosphatase	339
Alkyl phosphate metabolites, urinary	252
Alkylamine-generating pesticides,	
detection of	143
Allethrin derivatives	329
1 <i>R</i> , 3 <i>R</i> , 4' <i>S</i> Allethrin ( <i>S</i> -bioallethrin)	323
Alumina column	280
cleanup	371
LCEC assay for pesticide-derived	74
oxidation process for	71, 73
Amides, <i>N</i> -dimethylthiophosphinic	241
Amine(s)	
aliphatic	241
aromatic	241, 328
electrochemistry	71-73
conjugation of a carboxylic acid	
group to	328
-containing haptens to proteins,	
conjugating	328
heterocyclic	241
to phosphorus-containing com-	
pounds, derivatization of	241
phosphorylation reactions of	242f
residues by LCEC, determination	
of aromatic	71-75
-substituted biphenyl	74
2-Aminobenzimidazole (2-ABZI)	328
Aminocresol	143
4-Aminodiphenylamine	71
Aminofenitrothion	143
Amperometric detector, thin-layer	58, 59f
Alkaloids, pre-column derivatization	
for	22f
Analytical standards	253
Analyzer	
for drugs in biological fluids,	
FAST-LC	27f
with mobile phase recycling, 2,4-D	27f
totally automated herbicide	26f
Anderson impactors	179
Anilines, determination of urinary	
chlorinated	256
Anilines, halogenated	253
Anion exchanger, Permaphase AAX	10
Anion formation	354
Ant, imported fire	235

S-Bioallethrin (1R, 3R, 4'S allethrin) .....	323, 324f
RIA for .....	344
Biocides .....	65
BioGel P-2 .....	10
Biological fluids, FAST-LC analyzer for drugs in .....	27f
Biologically incorporated residues, recovery of .....	253
Biphenyl, amine-substituted .....	74
Bipyridylum herbicides .....	82
Blood cholinesterase, determination of .....	251
Blood, poison in .....	260
Bovine serum albumin (BSA) .....	328, 330
Bromide ions .....	365
Bromine vapors .....	137
Bromophos-ethyl and dimethoate, separation of .....	165

 $^{14}\text{C}$ 

-amino acids, radiochromatogram	
of the separation of .....	10, 13f
chromatographic detector, use of ..	6, 10
-labeled metabolites .....	1-13
Calcofluors (fluorescence whiteners) ..	137
Captafol .....	151
Captan .....	151
Carbamate(s) .....	65, 79
analyzer .....	19
N-aryl .....	243
chromatogram, comparison of UV	
and fluorescent tracings	
from .....	23f-24f
esters .....	66
insecticides .....	139, 239-243, 302
on TLC plates, detecting .....	267
pesticides .....	252
measuring exposure to .....	252
on-column methylation reactions	
of .....	244f
solvent systems for TLC separation	
of .....	268f
post-column derivatization for .....	23f
sulfur-containing .....	243
thermal instability of .....	309
Carbaryl .....	113, 145, 212
in food products, determination of ..	107
Carbetamide .....	74
Carbodiimides, water-soluble .....	325
Carbofuran residue in air samples 196f,	198f
Carbofuran, rice plants treated with ..	195
Carbon	
dioxide evolution from thiofanox ..	311
electrodes, glassy .....	58, 65
metabolism studies with radioactive	287
paste electrodes .....	58
Carcinogenic agents .....	362

BCl <sub>3</sub> .....	233
BF <sub>3</sub> /methanol .....	232
δ-BHC, calibration curves for .....	164 <i>f</i>
Baygon .....	139
Bayrusil .....	147
Beckman LS-200 series LSC .....	288
Bees, honey ( <i>Apis mellifera</i> L.) .....	120
extracts of pollen from .....	121 <i>f</i>
Benzene hexachloride (BHC) isomers, separation of .....	161
Benzidine .....	71, 73, 75
Benzil .....	355, 357 <i>f</i>
API negative ion mass spectrum for .....	358 <i>f</i>
Benzo[a]pyrene .....	328
<i>p</i> -Benzoquinone .....	73

- Carriers for pesticide haptens ..... 330-331
- Cascade impactors ..... 179
- Cation-exchange resin, polymeric ..... 70
- Cellulose
- HPTLC pre-coated plates ..... 167-168
  - layers, spectra of fisetin on ..... 140f
  - and silica gel 60, comparison of HPTLC pre-coated plate ..... 168
  - thin-layer chromatograms ..... 138
- Chelate spray reagent, fluorometric ..... 137
- Chemical derivatization
- advantages gained by ..... 232t
  - reaction criteria of ..... 232t
  - techniques in pesticide analysis ..... 231-247
  - techniques for pesticides, publications dealing with ..... 234f
- Chemical ionization (CI) ..... 353
- low pressure, (LPCI) ..... 353
  - mass spectrometric detection ..... 254
- Chemistry, mobile phase ..... 45
- Cholinesterase, determination of blood ..... 251
- Chlordecone (kepone) ..... 235
- Chlorinated
- anilines, determination of urinary .. 256
  - hydrocarbon pesticides, detection of non-polar ..... 254
  - organic pesticides, solvent systems for TLC separation of ..... 268t
  - phenols, problems of multi-residue procedure for ..... 255-256
- p*-Chloroaniline ..... 74
- Chlorodioxins ..... 277
- 2-Chloroethanol ..... 233
- 2-Chloroethyl ester ..... 235
- Chlorophenolate ions ..... 360
- Chlorophenols ..... 65, 243
- Chlorophenoxy acid residues in natural waters ..... 233
- Chlorophenoxy acids, esterification of ..... 232
- Chlorophenoxyalkyl acids, derivatives of ..... 233t
- Chlorpyrifos ..... 252
- Cholinesterase ..... 19
- Chronoamperogram ..... 60
- CI (*see* Chemical ionization)
- Chromascan ..... 265
- Chromatogram
- Analyser, Farrand VIS-UV ..... 129, 130f
  - cellulose thin-layer ..... 138
  - fluorometric detection of phosphate esters on paper ..... 137
  - instruments for measuring fluorescence on thin-layer ..... 129-133
- Chromatographic
- columns, performance evaluation of liquid ..... 31-43
  - detector(s) ..... 2
  - use of  $^{14}\text{C}$  ..... 6, 10
- Chromatographic (*continued*)
- separation ..... 7, 9
  - Chromatography ..... 52
  - argentation ..... 52
  - column absorption ..... 209
  - gas (GC) ..... 367
  - low resolution mass spectrometry ..... 280
  - high-performance liquid (HPLC) ..... 1-13, 107
  - high-performance thin-layer (HPTLC), developments in ..... 159-175
  - ion-exchange ..... 10
  - ion pair ..... 52
  - liquid (LC) ..... 1-13
  - with electrochemical detection (LCEC) ..... 57-83
  - fully automated sample treatment for (FAST-LC) ..... 15-29
  - partition ..... 7
  - pre-HPLC column ..... 107
  - reversed-phase ..... 9
  - improving mobile-phase selectivity in ..... 45-54
  - reversed-phase high-performance liquid (RPLC) ..... 45
  - silica gel adsorption ..... 113
  - thin-layer (TLC) ..... 127
  - of pesticides by fluorometry ..... 127-153
- Chromosorb 101 resin ..... 182
- Chromosorb 102 resin ..... 182
- Cleanup
- column ..... 16
  - alumina ..... 371
  - florisil ..... 370
  - micro- ..... 210-213
  - pre- ..... 19
  - continuous-flow ..... 213-215
  - procedures, pesticide residue ..... 209-228
- CMC (1-cyclohexyl-3-(2-morpholinyl-4-ethyl) carbodiimide methyl *p*-toluene sulfonate ..... 325
- CN-bonded polar phase, pesticides separated on ..... 110
- Coextractives ..... 113
- Colorimetric methods ..... 264
- Column
- adsorption chromatography ..... 209
  - alumina ..... 280
  - chromatography, pre-HPLC ..... 107
  - cleanup ..... 16
  - alumina ..... 371
  - florisil ..... 370
  - pre- ..... 19
  - derivatization for alkaloids, pre- ..... 22f
  - derivatization, post- ..... 19
  - for carbamates ..... 23f
  - for nitrosamides ..... 26f

Column ( <i>continued</i> ) .....		Coroxon .....	147
efficiency .....	32-34	Coumaphos .....	145-146f
function of pre-HPLC .....	113	degradation of .....	147, 148f
GLC, open-tubular (capillary) .....	192	Counters, liquid scintillation .....	3
GLC, packed .....	192	Coupling techniques .....	325
goodness .....	31-32	Cucumber extracts .....	119f
HPLC .....	31	Cyclic voltammetry (CV) .....	60
micro-particulate .....	9	1-Cyclohexyl-3-(2-morpholinyl-4-	
packings, bonded-phase .....	39, 42	ethyl) carbodiimide methyl	
packings for LC .....	9	<i>p</i> -toluene sulfonate (CMC) .....	325
peak .....		Cyclone separators .....	181
asymmetry, method for hand-		Cyolane .....	75, 82
calculating .....	38f	Cytrolane .....	75, 82
symmetry .....	34, 37		
tailing .....	34	<b>D</b>	
performance .....		1,4-D (2,4-dichlorophenoxyacetic	
criteria .....	31-43	acid)	
evaluation of liquid chromato-		analyzer with mobil-phase recycling .....	27f
graphic .....	31-43	esterification of .....	233
parameters, reduced .....	31	extractive pentafluorobenzoylation of .....	245
testing .....	43	fully automated HPLC analysis of ..	25
permeability .....	37	residues of .....	233
plate count .....	32	DC polarography .....	75
reactions, pre-	19	DCAA (dichloroacetic anhydride) .....	244f
reproducibilities .....	39-42	DCACl (dichloroacetyl chloride) .....	244f

Radioactivity detector .....	3, 4f
Radioactivity, measurement of .....	287
Radiochromatogram of the separation of <sup>14</sup> C amino acids .....	10, 13f
Radiochromatograph(s) .....	2-7
diagram of .....	4f
flow cells for .....	3, 5f, 6
operational problems of .....	6f
Radiochromatography System Model 4526, Nuclear-Chicago Liquid ..	3
Radioimmunoassay (RIA) .....	321
antigen competitive binding .....	333
for S-bioallethrin .....	344
bound/free separations in .....	333, 335
choice of radioligand .....	336-338
development of .....	322t
Radiolabeled antigen .....	333
Radioligand in RIA, choice of .....	336-338
Reflectance measurements by FTIR, diffuse .....	320
Residue	
analysis .....	1
near agricultural treatment sites, analysis of airborne .....	177-202
pesticidal .....	177-202
in air, determination of paraquat ..	179
of airborne parathion .....	197

- Residue (*continued*)
- analysis, application of LCEC in .. 65
  - analysis of PCP ..... 245
  - analytical methods ..... 151–152
  - of 2,4-D ..... 233
  - dissipation data, soil ..... 195
  - dissipation data, foliage ..... 195
  - electroreducible ..... 75
  - by LCEC, determination of
    - aromatic amine ..... 71–75
  - by LCEC, determination of
    - phenolic ..... 65–71
  - in natural waters, chlorophenoxy
    - acid ..... 233
  - of paraquat, determination of air-  
borne ..... 180f
  - pesticide
    - airborne
      - methods of sampling and  
analysis of ..... 178
      - sampling media for ..... 182
      - sources of ..... 189
    - cleanup procedures ..... 209–228
    - by GS/MS, analysis of
      - organotin ..... 367–383
    - in tissues ..... 252
  - recovery of biologically
    - incorporated ..... 253
  - related to pesticide applications,
    - source and fate of airborne .... 180f
  - sulphydryl ..... 329
- Resins
- binding of a charged antibody to
    - ion-exchange ..... 335
  - Chromosorb 101 ..... 182
  - Chromosorb 102 ..... 182
  - macroreticular ..... 182–188
  - polymeric cation-exchange ..... 70
  - polystyrene-based macroreticular .. 182
  - XAD-2 ..... 182
  - pesticide vapor sampling
    - efficiencies of ..... 184t, 187
  - XAD-4 ..... 182
- Retention force in RPLC ..... 45
- Reversed-phase chromatography ..... 9
- improving mobile-phase selectivity
    - in ..... 45–54
  - high-performance liquid (RPLC) .. 45, 280
  - hydrophobic effect in ..... 45
  - interactions in secondary
    - selectivity ..... 51–54
  - interactions in, solute ..... 47–54
  - modifier effect in ..... 47
  - primary equilibria in ..... 45–51
  - retention force in ..... 45
  - secondary equilibria in ..... 51–54
- Reverse-phase sorbents ..... 159
- Rf values ..... 267, 269
- RIA (*see* Radioimmunoassay) ..... 321
- Ronnel ..... 252
- Root zone technique, gelatin capsule .. 195
- RPLC (*see* Reversed-phase high-per-  
formance liquid chromatography)
- S**
- Salicyl aldehyde quinolyl hydrazone  
(SAQH) ..... 137
- Sampling and analysis of airborne  
pesticide residues, methods of .... 178
- Sampling media for airborne pesticide  
residues ..... 182
- Saponification ..... 277
- SAQH (salicyl aldehyde quinolyl  
hydrazone) ..... 137
- Scintillation
  - counters, liquid (LSC) ..... 3, 287, 337
  - counters, solid ..... 337
  - flow cell for aqueous systems ..... 5f
  - flow cell for organic solvents ..... 5f
  - Spectrometer Model 3021, Tri-Carb .. 3
- Scintillators ..... 7
- Selective ion monitoring (SIM)
  - method ..... 371
- Separation, chromatographic ..... 7, 9
- efficiency ..... 163
- Separation, optical isomer ..... 53f
- Serum
  - albumin, bovine (BSA) ..... 328, 330
  - albumin, human ..... 330
  - fully automated HPLC determina-  
tion of theophylline in human .. 25
- Silanol groups ..... 42
- Silica gel(s)
  - adsorption chromatography ..... 113
  - application of macroporous ..... 215
  - layers, fluorometric detection of  
organothiophosphorus pesti-  
cides on ..... 137
- 60 ..... 159
- comparison of HPTLC pre-  
coated plate cellulose and .. 168
  - HPTLC pre-coated plate(s) .... 160–163
  - comparison of TLC and ..... 161
  - with concentrating zone ..... 168,
  - 171–175
  - advantages of ..... 172, 175
  - with and without concentrating  
zone, comparison of ..... 171–175
  - pre-coated layers, TLC ..... 160
- SIM (selective ion monitoring) method 371
- Software, computer ..... 290
- Soil and plant surfaces following treat-  
ment, pesticide losses from .... 189–202
- Soil residue dissipation data ..... 195
- Solid scintillation counters ..... 337

SOLIDprep sampler for HPLC .....	18	TCTH ( <i>see</i> Tricyclohexyltin hydroxide) .....	
Solute(s) .....	9	TCTM (tricyclohexylmethyltin) .....	377
interactions, water- .....	47	mass spectrum of .....	377, 380f
Solvent(s) .....		reaction scheme for the conversion of TCTH to .....	380f
